MEDFUSER® NRFit Key Elements

Robust, UV light shielding protective case.

Elastomeric (silicone) balloon providing stable infusion pressure and proven drug stability.

Prominent product information to help identify the appropriate pump for safe patient treatment.

Accurate fluid level indicator provides peace of mind for clinicians and patients.

Luer-lock filling port inlet with cap.

Integrated hanger and clip.

Distal-end protective cap automatically helps to prime the patient line without spills.

Removable slide clamp gives clinician control on starting and stopping infusions.

Yellow colour connector and hydrophobic cap identify NRFit® connector, compatible only with regional anaesthesia devices.

Integrated air filter and 1.2 micron particle filter automatically removes air and impurities from the patient line.

Flow regulator capillary with unique design accurately controls the medication flow.
