# FFP3 face mask

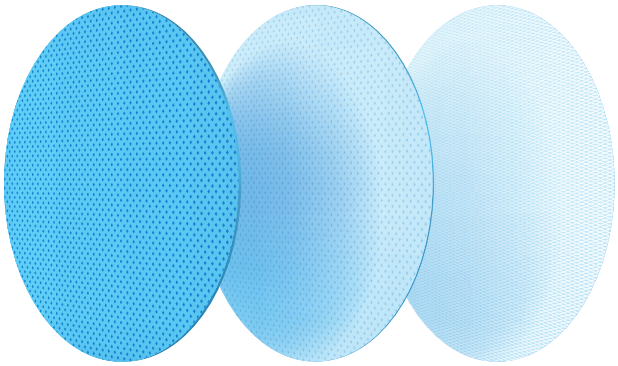
## Single use healthcare respirator

Our FFP3 face masks have a 3 panel design for improved fit, feel and comfort on a variety of face shapes. The soft foam nose former, smooth inner material, chin tab and adjustable headbands provide additional comfort during use. The front facing valve removes exhaled air for a cooler environment and minimises the risk of misting eyewear. We recommend that FFP3 masks are worn subject to and in conjunction with a recognised "face fit test".

### KEY FEATURES

- 3 panel design for greater fit on a variety of face shapes.
- Individually wrapped in a flat, easy to store form.
- Soft foam material over the nose section combined with smooth inner material for increased comfort whilst in use.
- Strong, adjustable headbands for improved fit, feel and comfort.
- Front facing valve to remove exhaled air, retain cool environment for the wearer and minimise the misting of eyewear.

### LEVELS OF PROTECTION



**OUTER LAYER**
Fluid repellent to EN14683 standard and the first line of defence against dust and droplet contamination from external exposure.

**MIDDLE LAYER**
Non-woven material designed and engi- needed to provide an additional barrier against bacteria and pathogens.

**INNER LAYER**
This material provides comfort against the face and absorption of breath moisture.

- Latex free, non sterile construction
- Compliant to EN149 Standard
- Available in white with red
- Bacterial Filtration Efficiency (BFE) Performance not less than 99%
