Nitrile Gloves

for the medical, laboratory and manufacturing industries

Gloves are effective in preventing contamination of hands and helping reduce transmission of pathogens. Our range of non-sterile Nitrile gloves are made from synthetic rubber, meaning there is no risk of latex allergies. They are the most popular glove type in our range and offer superior strength, dexterity and resistance to oils and aqueous chemicals in comparison to vinyl or latex.

KEY FEATURES

- Nitrile examination gloves provide a highly effective and durable barrier against blood and bodily fluids.
- Provide excellent comfort, grip and tactile control.
- Nitrile examination gloves are a good alternative to latex exam gloves and are suitable for use by Type I allergy sufferers.
- 3 gram weight, 6 newton break strength.
- Standard cuff length.
- For single use only.

Conforms to:

- EN 455
- EN ISO 374-1:2016
- EN ISO 374-5:2016/TYPE B
- EN 420:2006+A1:2009
- EN 16523-1:2015
- PPE regulation 2016/42

The use of gloves does not replace the need for hand cleansing by either hand rubbing or handwashing.
