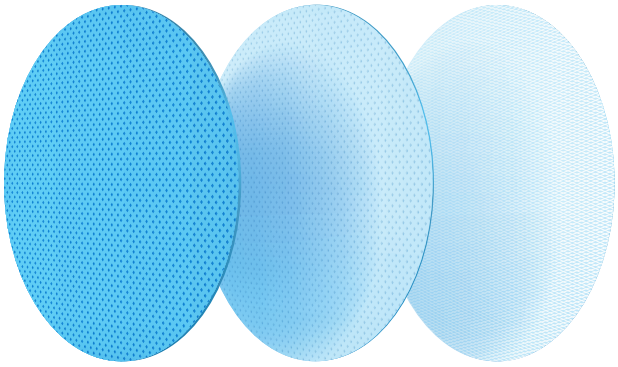
Adult Type IIR face mask
with tie backs

Our Type IIR face masks (EN14683) are medical face masks made up of a 3 ply construction that prevents large particles from reaching other people or working surfaces. Type IIR face masks include a splash resistant layer to protect against blood and other bodily fluids.

KEY FEATURES

- Type IIR surgical face masks offer medical grade protection for everyday use.
- Tie backs provide ability for bespoke positioning and fit.
- The curved ergonomic design ensures that you have a close fit along the jawline, minimising gaping to the sides of the face.
- Splash resistant outer layer provides protection from body fluids.
- Integrated nose band can be moulded to the wearer's face to give a secure and comfortable fit.

LEVELS OF PROTECTION



OUTER LAYER
Fluid repellent to EN14683 standard and the first line of defence against dust and droplet contamination from external exposure.

MIDDLE LAYER
Non-woven material designed and engineered to provide an additional barrier against bacteria and pathogens.

INNER LAYER
This material provides comfort against the face and absorption of breath moisture.

- 3-ply construction
- Compliant to EN14683 Standard
- Non-sterile, latex-free
- Validated bacterial filtration efficiency (BFE) performance of 99.6%
